Dear Hiring Manager,

I am excited to apply for the Software Engineer position. With a Master of Science in Computer Science from the University at Buffalo and two years of professional experience in Java, Python, and Spring Boot, I am eager to contribute to innovative projects while honing my skills in software engineering and machine learning domains.

In my current role at Tia Infotech Corp, I designed and implemented a Spring Boot application with RESTful APIs, improving performance by 20%, and streamlined CI/CD pipelines, reducing deployment time by 40%. My previous role at MaxoTech Solutions involved optimizing backend performance and developing a recommendation engine, which boosted user engagement by 12%. Additionally, during my internship at Hebeon Technologies, I built a machine learning model with 92% accuracy, demonstrating my ability to apply AI techniques effectively.

I am particularly drawn to the opportunity to work on impactful projects at your organization and bring my expertise in software development, cloud technologies, and scalable systems to your team. Thank you for considering my application. I look forward to discussing how my background aligns with your needs.

"I am open to relocating for this opportunity."

Sincerely,
Sai Kiran Paturi
